**Thomas Harriman Joins Technical Innovation As
Enterprise Video Communications Account Manager**

NORCROSS, GA, February 8, 2010 — Technical Innovation, one of the southeast's leading providers of digital media technology solutions, is pleased to announce that Thomas Harriman has joined their Enterprise Visual Communications Group as an account manager.

At Technical Innovation, Tom will be responsible for presenting TI's competency for designing and implementing enterprise-level communications networks to the markets the company serves throughout the southeastern United States.

Tom has a solid record of working with Fortune 1000 companies to increase their productivity by developing a unified communications strategy. He will be working with Technical Innovation systems engineers and senior network consultants to take separate technologies such as of videoconferencing, streaming, digital media storage, and SIP-based audio and presence technologies, to deliver cost-effective unified communications and collaboration solutions for TI customers.

Mr. Harriman's more than 15 years of experience in providing IP and voice networking solutions includes senior sales, marketing, and product management positions at such industry leaders as InterCall and MCI. Tom is excited about joining the team at Technical Innovation. "I look forward to putting my talents and expertise to work at an organization that believes in being technologically ahead of the curve while also maintaining a passion for exceptional customer service," noted Tom. "I'm confident that we'll be able to take the company, and our customers, to new heights."

"When you take a fine technical team and put an experienced account manager in the mix, very good things happen," noted Parker Emery, Director of the Enterprise Visual Communications Group at Technical Innovation. "We at TI have a strong history of bringing productivity-enhancing solutions to our customers, and this combination of real-world knowledge with technical savvy will only extend that reputation. Tack on a professional services/support team that is setting the industry standard, and we've got what we think is an unbeatable team."

Mr. Harriman has developed and maintained solid relationships over the years with major accounts (including some of the largest companies in the Southeast) and industry strategic partners (including Microsoft, Cisco, Polycom, and Tandberg), and he expects to extend and enhance those connections. "It's great to be able to help build the Technical Innovation presence in the enterprise market," said Tom.

ABOUT TECHNICAL INNOVATION, LLC

Technical Innovation focuses on providing video-centric communication solutions to corporations, state and federal government agencies, universities, professional organizations, and the church market. As an experienced audio/video systems designer as well as a leading design-build audio-video system integrator, Technical Innovation is uniquely positioned to provide customers with exactly the services they require, from comprehensive design to turn-key design-build services, including services such as custom software development, integration, project management, training, and ongoing customer support.
