Technical Innovation's Raleigh Office Awarded the Highest A/V Industry Certification

Norcross, GA, June 3, 2005 – Technical Innovation, a design-build video systems integrator, is pleased to announce that its Raleigh, NC office received Gold Certified AudioVisual Solutions Provider status from the International Communications Industries Association, Inc.® (ICIA®) and the International Communications Industries Foundation (ICIF). The Raleigh office joins the Nashville and Atlanta offices of Technical Innovation in having received the audiovisual industry's highest regarded certification.

“A CAVSP designation gives AV companies a competitive advantage in the marketplace,” said Randal A. Lemke, Ph.D., ICIA's executive director. “Customers of audiovisual communications and presentation systems can be confident of professionalism and an aspiration to excellence when working with these companies that have invested in education and training to stay current on the latest AV technologies and techniques.”

In addition to the clear benefit to customers, it also signifies Technical Innovation's commitment to maintaining a skilled and technically advanced workforce. “The three largest Technical Innovation offices are now CAVSP Gold certified,” commented Kevin Powers, Technical Innovation Managing Principal. “Few companies, if any, can match our level of technical expertise.”

Page 1 of 2

The CAVSP Program includes three levels -- basic, silver and gold certified members -- depending on the percentage of staff within an organization that has received individual certification. Individual certification is known as the Certified Technology Specialist (CTS) program, and consists of general certification as well as specialized certification in design, installation, rentals or sales. The Raleigh office of Technical Innovation is proud to boast a Gold Standard Certification demonstrating that 82% of the staff is CTS Certified.

Companies eligible for CAVSP status include businesses that manufacture, sell, integrate, design, provide consultation on or rent AV equipment, systems and services. The CAVSP program (formerly ICIA's Certified Member Program) ties in with the AVolution Industry Awareness Campaign that promotes the skills and talents of professional AV solutions providers (AVSPs). To achieve CAVSP status, the company must participate in AVolution by agreeing to 10 Standards of Excellence. More information on ICIA's certification program and educational courses is available at www.infocomm.org.
